

Cloud & Digital Standard Products Progress Report

Abdulrahman Sharqawi
16 June 2025 – 7 August 2025

Week 1 Highlights June 16 – June 19

Power Usage Efficacy study with Ismail

- 1- Contacted Submer
- 2- Contacted Aces
- 3- Confirmed the energy cost

Summary:

GPU Model : NVIDIA RTX 5090

Number of GPUs : 166

Power per GPU : 575 W

Monthly Uptime : 24/7 (30 days)

Air Cooling Power: ~116,831 kWh/month

Immersion Power : ~72,160 kWh/month

Energy Saved : ~44,671 kWh/month

Cost Saved : **14,294.5 SAR/month for every 166 GPUs**

Efficiency Gain : ~38% reduction in total energy usage

Dear AbdulRahman,

The CCM dean is planning to establish two graduate labs with computational resources.
You can check with him.

Best regards,

Week 2 Highlights June 22 – June 26

Ismail, Yara, and Leena

1- Frame agreement pricing for all the cloud products with the infrastructure team

2- Updated the tender analyzer for the pre-sale team

3- GPU NCP sales slides for the new H200/B300 GPU's

4- Palo Alto Migration Plan

- 1- Get all the internal team in place
- 2- Get the required invoices from Unity
- 3- Do a handover between Taheer and

Abdulrahman

4- Discuss the plan with the technical team

Results:

1- 4 months early planning for

5- Checklist tracking sheet with Ismail

GPU NCP Slides (1)

New GPUaaS offering H200 /B300

Feature	B300 (Blackwell)	H200 (Hopper)
Architecture	Blackwell (Next-generation evolution)	Hopper (Successor to H100)
Target Applications	Trillion-parameter models, multi-modal AI, AI supercomputing	LLMs, Generative AI, large-scale inference
Memory Bandwidth	Expected to be higher	Up to ~4.8 TB/s with HBM3e
Memory Capacity	Expected to support even larger datasets and model sizes	Increased memory for handling larger datasets and model sizes
Performance Focus	Transformative performance for massive workloads	Faster time-to-insight, high throughput for AI tasks
Ideal For	National supercomputing, data center-scale workloads	Enterprises building foundation models, faster inference
Availability	Upcoming (future roadmap)	Available now (post-H100)
Shared Benefits	- Massive Parallel Processing Power - Dedicated AI Accelerators (Tensor Cores) - Exceptional Energy Efficiency for Intensive AI Workloads

General Fixes and Additions to the DNR Page Confidential

Abdulrahman E. Sharqawi

Wed 7/2/2025 12:16 PM

To:  Ahmed Dabour

Cc:  Abdullatif M. Almesfer;  Muhammed M. Iqbal;  Yasir Hisham Shareefi

Dear @Ahmed Dabour,

As discussed with you yesterday for the website updates, for the CST logo and the fixes on the main page which are:

Additional touches to the website:

1- CST image in the main page

We are a CST licensed Domain Name Registrar for Saudi domains.

هيئة الاتصالات والفضاء والتقنية
Communications, Space &
Technology Commission

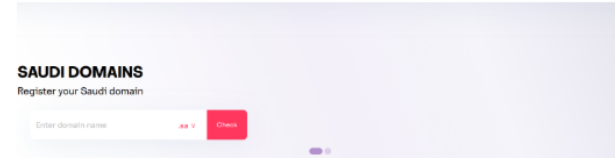

-  Register a domain name
-  Transfer a domain name
-  Update the registrant information
-  Update the administrative contact information
-  Add DNSSEC
-  Change the name servers
-  Add Multi Factor Authentication
-  Authenticate through OTP for administrative contact change

Fixes:

1- Drag and drop section to start appearing fully in all browsers.

2- Getting rid off the toggle between the empty and the transfer your domain service for now

Week 3 Highlights June 29 – July 3

Transfer Domain Ownership

Domain ownership transfer allows a domain to be reassigned to a new registrant. This process is securely managed through the Domain Name Registrar platform and requires confirmation from both parties.

Select a domain to transfer Start

Important Points Before Transferring Your Domain Ownership

- The new registrant must be eligible to register the domain according to the terms and conditions of the Domain names Registration Regulations.
- The new registrant is responsible of the domain hosting continuity.
- In the case of request cancellation, all the concerned parties are notified.
- The request is only considered to be received by SaudiNIC after the Administrative Contact approves it, otherwise it will not be considered to be received and will remains pending.
- Pending requests are rejected automatically after one week.
- In case Administrative Contact did not receive the activation message, the account holder can resend it again.

How to Transfer Ownership?

- 1. Request the Transfer:** The current owner starts the process by submitting a request with the new owner's details and documents to the registrar.
- 2. New Owner Approval:** The new owner receives a request to approve or reject the transfer.
- 3. Verification:** Solutions by STC checks that all the information and documents are correct and complete.
- 4. Transfer Complete:** Once everything is verified, the domain ownership is transferred, and the new owner can fully manage the domain.

7 All the correspondence regarding the request are sent to the account holder and the Administrative Contact.

What is a Domain Name and How Does It Work?

July 15, 2025 Solutions by stc Team

In today's digital age, most things start with a website. Whether you're building an e-commerce store, creating a personal portfolio, or launching a business venture, your journey begins with a domain name. But what exactly is a domain name, and how does it work behind the scenes? In this blog, we'll explain it simply.

What is a Domain Name?

A domain name is the unique address you type in your browser to visit a website, such as google.com or stc.sa. It's a human-readable version of the website's actual location on the internet, which is identified by an IP address - a string of numbers like 192.168.1.1.

A DOMAIN NAME IS

Week 5 Highlights July 13 – July 17

Sunday, July 13

7/13 4:26 PM Edit

number of licenses // how many did he order in DNR
license type // yearly, basic, standard or premium
pickup the domain name // will be done manually by asjad
show the cost to be paid // in services
change message from payment completed to order pending// don't change
when will the customer get billed? // in Ingram not in DNR
start date should start when activated // once activated

Abdullatif M. Almesfer 7/13 9:05 PM

Thanks a lot for summarizing the UAT points, it's very helpful **Abdulrahman E. Sharqawi** @

Sun 7/13/2025 9:07 PM

Internal

Dear @Ahmed Dabour,
Hope you're doing well,

Following the recent **UAT** session conducted for the MS365 offering on our domains portal, please find below my observations and recommendations to enhance the customer journey and ensure a smooth experience:

1. **License Quantity Display:** The number of MS365 licenses ordered by the customer should be clearly shown in the subscription on DNR dashboard.

2. **License Type Display:** Ensure the selected MS365 license type (Basic, Standard, or Premium) is displayed to the subscription on DNR dashboard.

3. **Final Step Confirmation Message:** Please update the message shown at the final step from:

"Payment completed"

To:

"Your MS365 order has been received and will be activated within 1-3 business days."

4. **Billing Behavior Verification**

- Kindly verify and confirm when the customer is billed for the MS365 subscription:
 - Is it an immediate upfront annual payment at subscription activation?
 - Or based on Billing Cycle Date (BCD)?

5. **Subscription Start Date Display:** The MS365 subscription start date in DNR dashboard should reflect the actual activation date, which is triggered upon activation by the product team.
